AGRANCO World Distribution Network

Agranco Group is a manufacturing and sales organization headquartered in Coral Gables, Florida and manufacturing companies located in Mexico and the U.S. It has a network of distributors in Mexico, United States, Central America, South America, Europe, Middle East, Africa and Asia, all dedicated to providing distribution and service of our products, with its own staff of engineers, technical specialists and PhD in every area of activity.

Animal Nutrition: Selective Adsorbents Mycotoxins, Organic Minerals microencapsulated probiotics and Immunomodulators, Enzymes, Yeast and Microflora regulators.

Agricultural Industry: Organic Insecticides, Fertilizers, natural and biodegradable.

Aquaculture Industry: Yeast, Enzymes, Probiotics and oligosaccharides for shrimp and fish rations.

Food Processing : Disinfectants food for human consumption.

Sugar Industry : Stabilizers of pure cane juice

Water Treatment : Decomposers of organic matter and water purification.

The products are marketed under its own brand, are unique and specific to improving processes in each industry, having fully researched about them, proving their effectiveness in every field. We invite you to evaluate waiting to exceed your expectations and be part of our user list.

What is Agracid-S

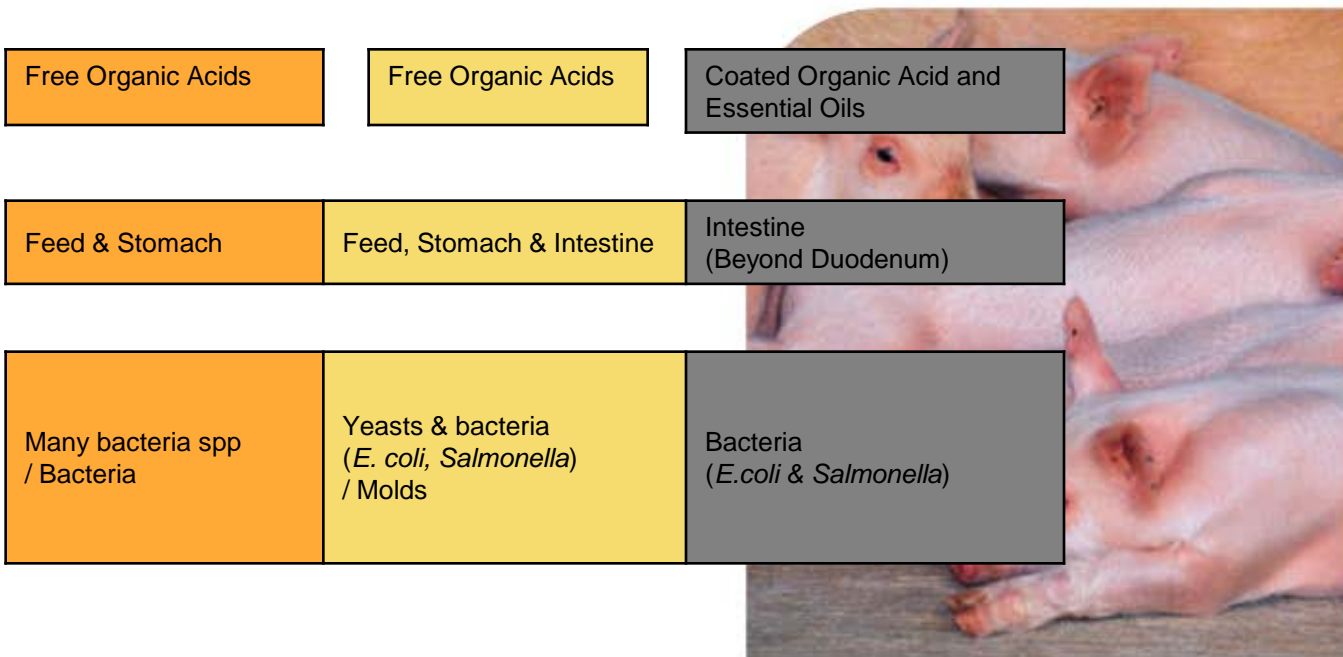

AGRACID-S is a concentrated form of organic acids premix and natural aromatic substances, protected in a special matrix of fatty acids, for its utilization as an intestinal modulator in swine feeds.

All ingredients of Agracid-S are approved by FDA under American Association of Feed Control Officials (AAFCO), No. 57.150, Publication: 1,998.

Mode of Action

AGRACID-S Under its "Patent Pending" manufacturing process, has a triple effect mechanism of action: Quick release of dissociated acids in the stomach of the animal, slowly and controlled release of the organic acids in the intestinal tract in a NON – Dissociated form, reducing drastically enteric improving the zotechnic problems and antibacterial action directly in the feed upon contact. This technology, developed by AGRANCO, is known as C.S.R.T. (Coating Sustained Released Technology), Patent Pending, for the simultaneous treatment of stomach, GIT and feed.

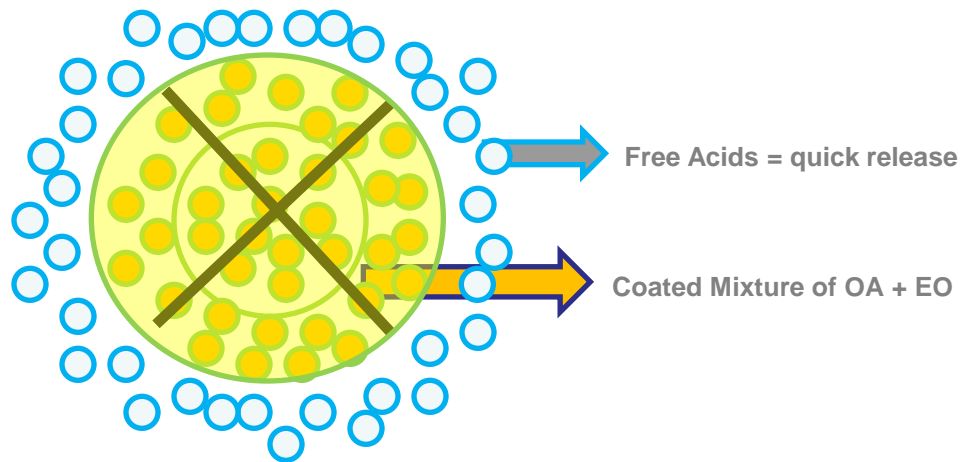

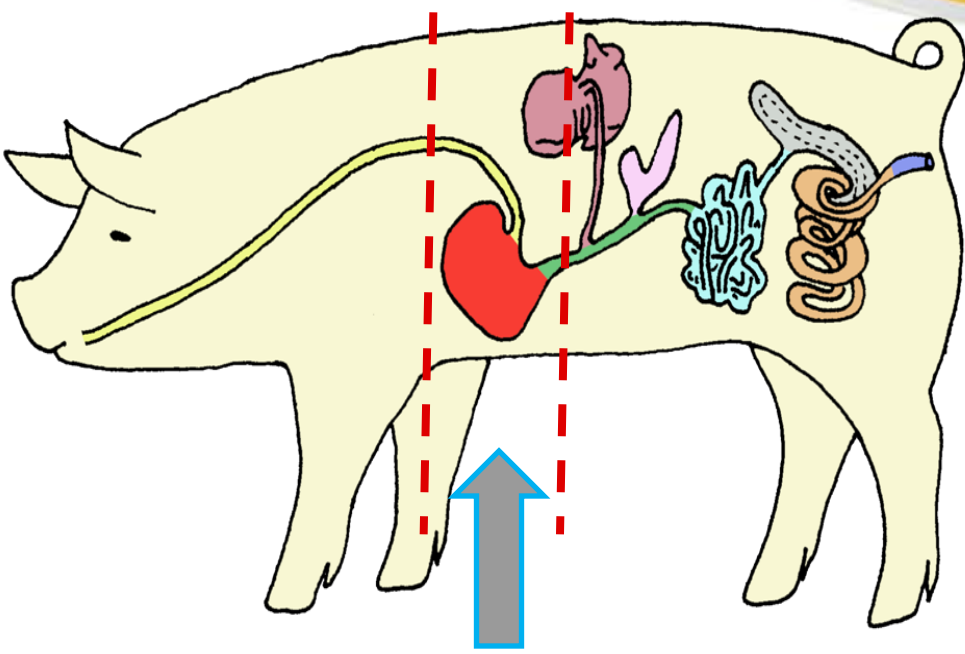

Agracid-S Provides Triple Action

Manufactured by
AGRANCO CORPORATION USA

Agracid-S First Effective Action

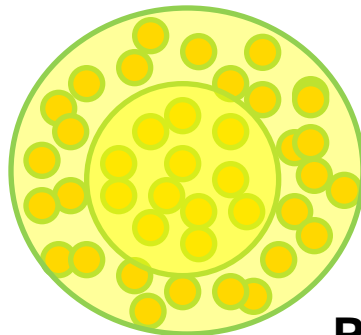

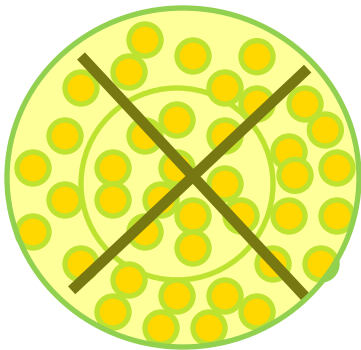

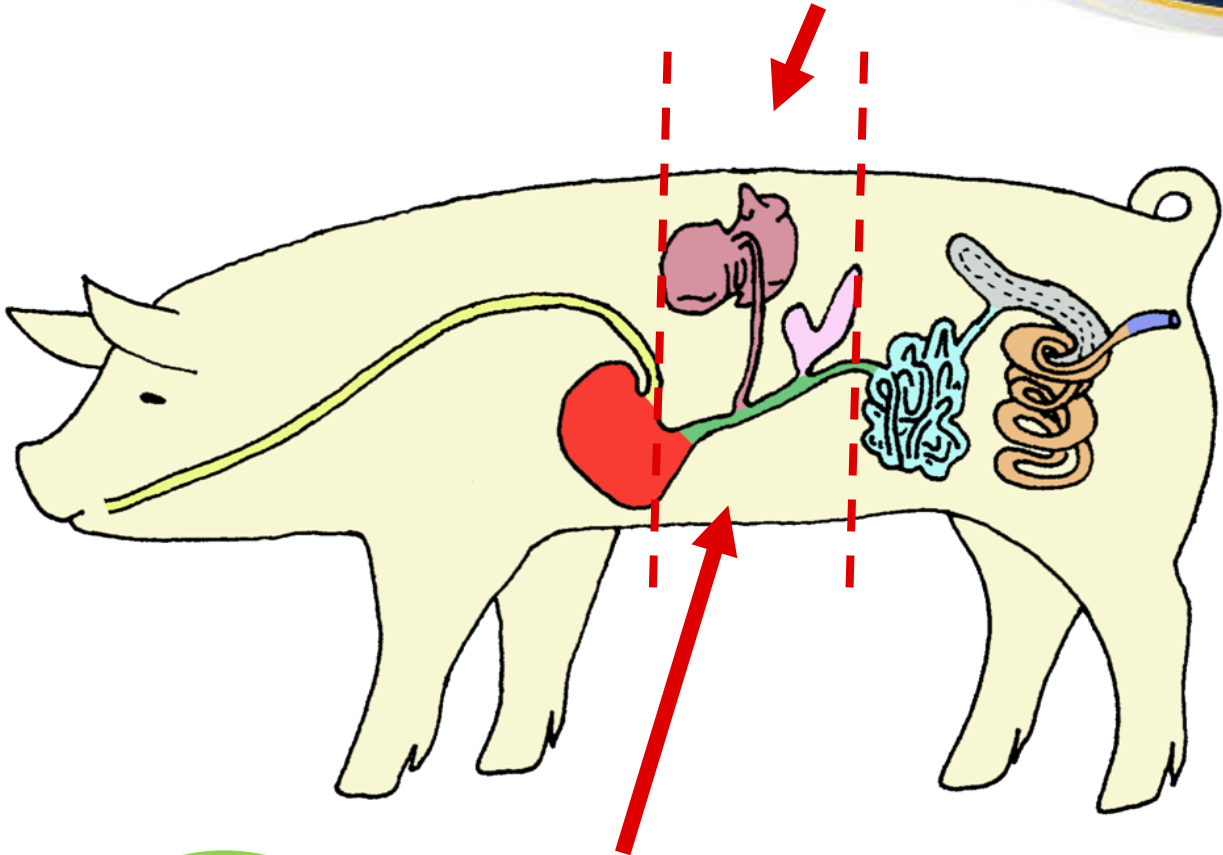

Protected = Slow Release

Agracid-S Third Effective Action

Gradual Release

Patent Pending Target Medium = CSRT

Coating Sustained Release Technology

Application:

Nutritional supplement

AGRACID-S Characteristics: Color: Micro-pearls White.

Odor: Characteristic

Granulometry: 500-1,000 microns.

pH: 1.5 (+)(-) 0.5

Rate of Application:

Piglets: 250 gr / MT of Feed.

Starters: 250 gr / MT of Feed.

Breeder Pigs: 250 gr / MT of Feed.

Benefits:

Improvement of intestinal health.

Effective alternative to antibiotics and growth promoters.

Packaging and Storage

25 kg poly-ethylene bags in export carton boxes or 1,000 kg bulk bags. Store in dry area, under roof at ambient temperature away from sunlight.
